

## PRODUCT RELEASE

# Ultra Series Pistons for Ultra-HP M8 Engines

JE's Industry-Leading Piston Technology Has Been Expanded to  
Harley Milwaukee-Eight Engines

*It's no secret – Big Twin riders like Big Time horsepower. JE has applied proprietary, Ultra Series piston technology to the Milwaukee-Eight engine platform from Harley-Davidson, designed to withstand the extreme demands of 400+ HP, boost hungry V-twin builds.*

- **Proprietary Aligned Grain Flow** forging technology delivers maximum tensile strength suited for high-performance environment
- **Thermal barrier crown coating** protects the piston by reducing heat transfer, especially in excessive heat environments
- **Internal and external bracing** maintains optimized strength-to-weight ratio for longevity
- **3D undercrown milling** in non-critical areas reduces overall weight
- **Lateral gas ports** and **accumulator groove** maintain power-producing ring seal even at high RPM and high boost
- **Skirt coating** reduces operating friction and wear throughout the life of piston
- **Offset pins** reduce piston rock and minimize engine operating noise
- **Skirt notches** for optimal clearance at bottom dead center
- **Supplied as a kit** - Piston kit includes piston, premium ring pack, wrist pin, and wire locks - all under one part number
